

BAMBOO ICHIRI

Our selection of nigiri is prepared with **YAKUMI** minimal and bright toppings to complement the flavor of each piece of fish.

You can also order all nigiri "neat" without toppings.

GLOSSARY

MSC - certified by the Marine Stewardship Council, an international organization setting the standard for sustainable fishing with full traceability.

● - Seafood Watch® Best Choice. Abundant, well-managed, and caught in environmentally friendly ways.

● - Seafood Watch® Good Alternative. While not rated Green, these selections are still caught using sustainable methods and we constantly monitor the health of these fisheries.

NR - while not rated by a third-party organization, we have done our own research to ensure this is a sustainable item based on its species, fishery, and catch method.

BYCATCH - the unintentional catch of fish and other marine creatures. We only feature seafood caught in a way that limits bycatch.

AQUACULTURE - the farming of fish, crustaceans, molluscs, and even aquatic plants.

BOTTOM CULTURE - a sustainable aquaculture practice of growing a species on the seabed and harvesting them by hand.

POT AND TRAP - used for species like lobster and octopus, designed with holes to let those species beneath the legal catch size escape.

PURSE-SEINE - using a large wall of netting to encircle and catch a specific school of fish.

OPEN NET PENS - a form of aquaculture that raises fish in contained areas in open water.

DEEP SET LONGLINE - a central fishing line with multiple baited hooks, set deep enough in the water to avoid unwanted bycatch.

HOOK AND LINE, TROLL AND POLE - using a pole and one or more baited hooks to catch fish in smaller quantities, either with the boat standing still or moving at a slow speed.
