GLOSSARY

MSC – certified by the Marine Stewardship council, an international organization setting the standard for sustainable fishing with full traceability.

● - Seafood Watch® Best Choice. Abundant, well-managed, and caught in environmentally friendly ways.

● - Seafood Watch® Good Alternatives. While not rated Green, these selections are still caught using sustainable methods and we constantly monitor the health of these fisheries.

NR – while not rated by a third-party organization, we have done our own research to ensure this is a sustainable item based on its species, fishery, and catch method.

BYCATCH – the unintentional catch of fish and other marine creatures. We only feature seafood caught in a way that limits bycatch.

AQUACULTURE – the farming of fish, crustaceans, molluscs, and even aquatic plants

OPEN NET PENS – a form of aquaculture that raises fish in contained areas in open water.

DEEP SET LONGLINE – a central fishing line with multiple baited hooks, set deep enough in the water to avoid unwanted bycatch.

HOOK AND LINE, TROLL AND POLE – using a pole and one or more baited hooks to catch fish in smaller quantities, either with the boat standing still or moving at a slow speed.
